Estimation of INTERNATIONAL MIGRATION (*first ever*)

STATISTICS Dissemination, Communication

NATIONALIZED SDGs indicators - *migration*

CONCLUSIONS, LESSONS LEARNED, NEXT STEPS

Estimation of INTERNATIONAL MIGRATION *(first ever)*

Context and stages passed in estimation of international migration

Context & Premises

High flow of **unregistered** international migration

Alignment of the national statistical system with international and European standards

Implementation of the concept of *usual residence* in official statistics (Census)

1

Identify suitable data **SOURCE** & methodology

2

Get **DATA** from the identified data holder

3

Apply international **DEFINITION** using border crossing data

4

Data analysis, imputation and **PROCESSING**

5

Calculate the (e/i)migrant **STATUS**

MINISTERUL AFACERILOR INTERNE | GUVERNUL REPUBLICII MOLDOVA

POLIȚIA DE FRONTIERĂ

PUBLIC SERVICES AGENCY

1. Identify suitable DATA ...

Sources

Limitations

Statistical surveys

collect information for a relatively small part of the population

limited use of surveys data disaggregated by age, sex and small population groups and geographical subareas

Population census

are conducted only once in a while

cannot be used to produce yearly estimates

Administrative data

not always available in reliable and complete form

main data source that can be considered the most suitable source for the analysis of international migratory flows

migration STOCK

migration FLOW

1. Identify suitable ... METHODOLOGY

= Threshold

= TOLERANCE =

183 (6 months+1 day)
275 days (9 months)
305 (10 months)
335 (11 months)

temporary absences measured

182 (6 months)
90 days (3 months)
60 (2 months)
30 (1 month)

temporary absences excluded

2. Get DATA from identified data holder

1.5 mln. unique persons
34.8 mln. border crossings

RM citizens

1.7 mln. unique persons
41.1 mln. border crossings

0.7 mln. unique persons
13,4 mln. border crossings

foreign citizens

1.2 mln. unique persons
18.7 mln. border crossings

3. Apply DEFINITION - international migration

Immigrant

person who **ENTERED** the country and stayed in the country for at least **9 months** during the upcoming year after living abroad for at least **9 months** in the previous year

Emigrant

person who **EXITED** from the country and lived abroad for at least **9 months** during the previous year, living in RM for at least **9 months** the year after

Net migration = numbers of immigrants - emigrants during one year

4. Data analysis, imputation, processing

Identification of "illogical" itineraries

	IDNP	gender	birth_date	set	id	m_dir	citizenship	date	Y
201	18	m	10.07.1990	1	676	exit	MOLDOVA	03.11.2015	2015
204	19	m	11.09.1991	1	679	exit	MOLDOVA	27.01.2013	2013
205	19	m	11.09.1991	1	680	entry	MOLDOVA	28.04.2013	2013
206	19	m	11.09.1991	1	681	exit	MOLDOVA	11.09.2013	2013
207	19	m	11.09.1991	1	682	exit	MOLDOVA	24.01.2014	2014
208	19	m	11.09.1991	1	683	entry	MOLDOVA	24.01.2014	2014
209	19	m	11.09.1991	1	684	exit	MOLDOVA	28.01.2014	2014
210	19	m	11.09.1991	1	685	entry	MOLDOVA	23.05.2014	2014
211	19	m	11.09.1991	1	686	exit	MOLDOVA	01.09.2015	2015
217	20	m	19.10.1990	1	692	entry	MOLDOVA	09.10.2013	2013

- movements of a person for 2013-2015
- illogical itinerary

Imputation of a missing movement

	IDNP	gender	birth_date	set	id	m_dir	citizenship	date	Y
249	18	m	10.07.1990	1	676	exit	MOLDOVA	03.11.2015	2015
250	19	m	11.09.1991	1	679	exit	MOLDOVA	27.01.2013	2013
251	19	m	11.09.1991	1	680	entry	MOLDOVA	28.04.2013	2013
252	19	m	11.09.1991	1	681	exit	MOLDOVA	11.09.2013	2013
253	19	m	11.09.1991	1	681	entry	MOLDOVA	18.11.2013	2013
254	19	m	11.09.1991	1	682	exit	MOLDOVA	24.01.2014	2014
255	19	m	11.09.1991	1	683	entry	MOLDOVA	24.01.2014	2014
256	19	m	11.09.1991	1	684	exit	MOLDOVA	28.01.2014	2014
257	19	m	11.09.1991	1	685	entry	MOLDOVA	23.05.2014	2014
258	19	m	11.09.1991	1	686	exit	MOLDOVA	01.09.2015	2015
259	20	m	19.10.1990	1	692	entry	MOLDOVA	09.10.2013	2013

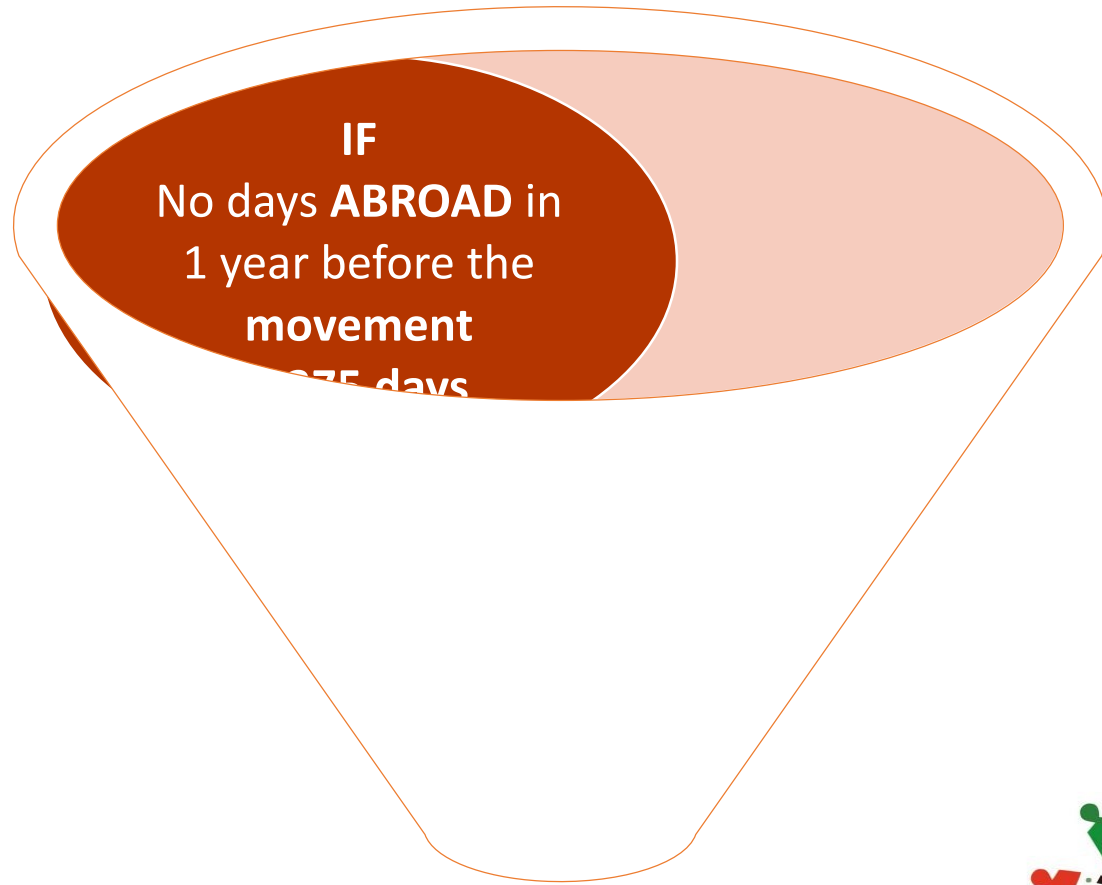

- imputed movement, the date is at the half of the illogical itinerary

Assignment of a date to the missing movement

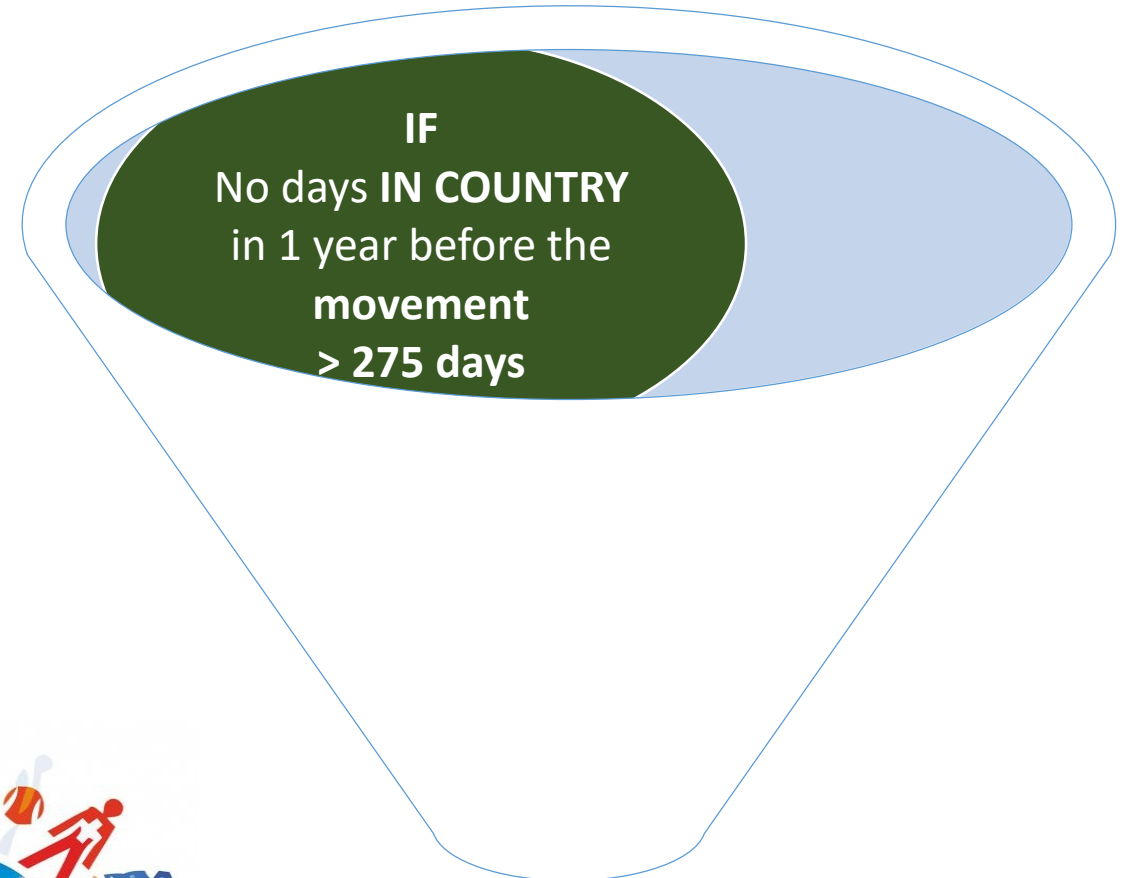

5. Calculating migration status – by MOVEMENTS, by individuals

immigrant

emigrant

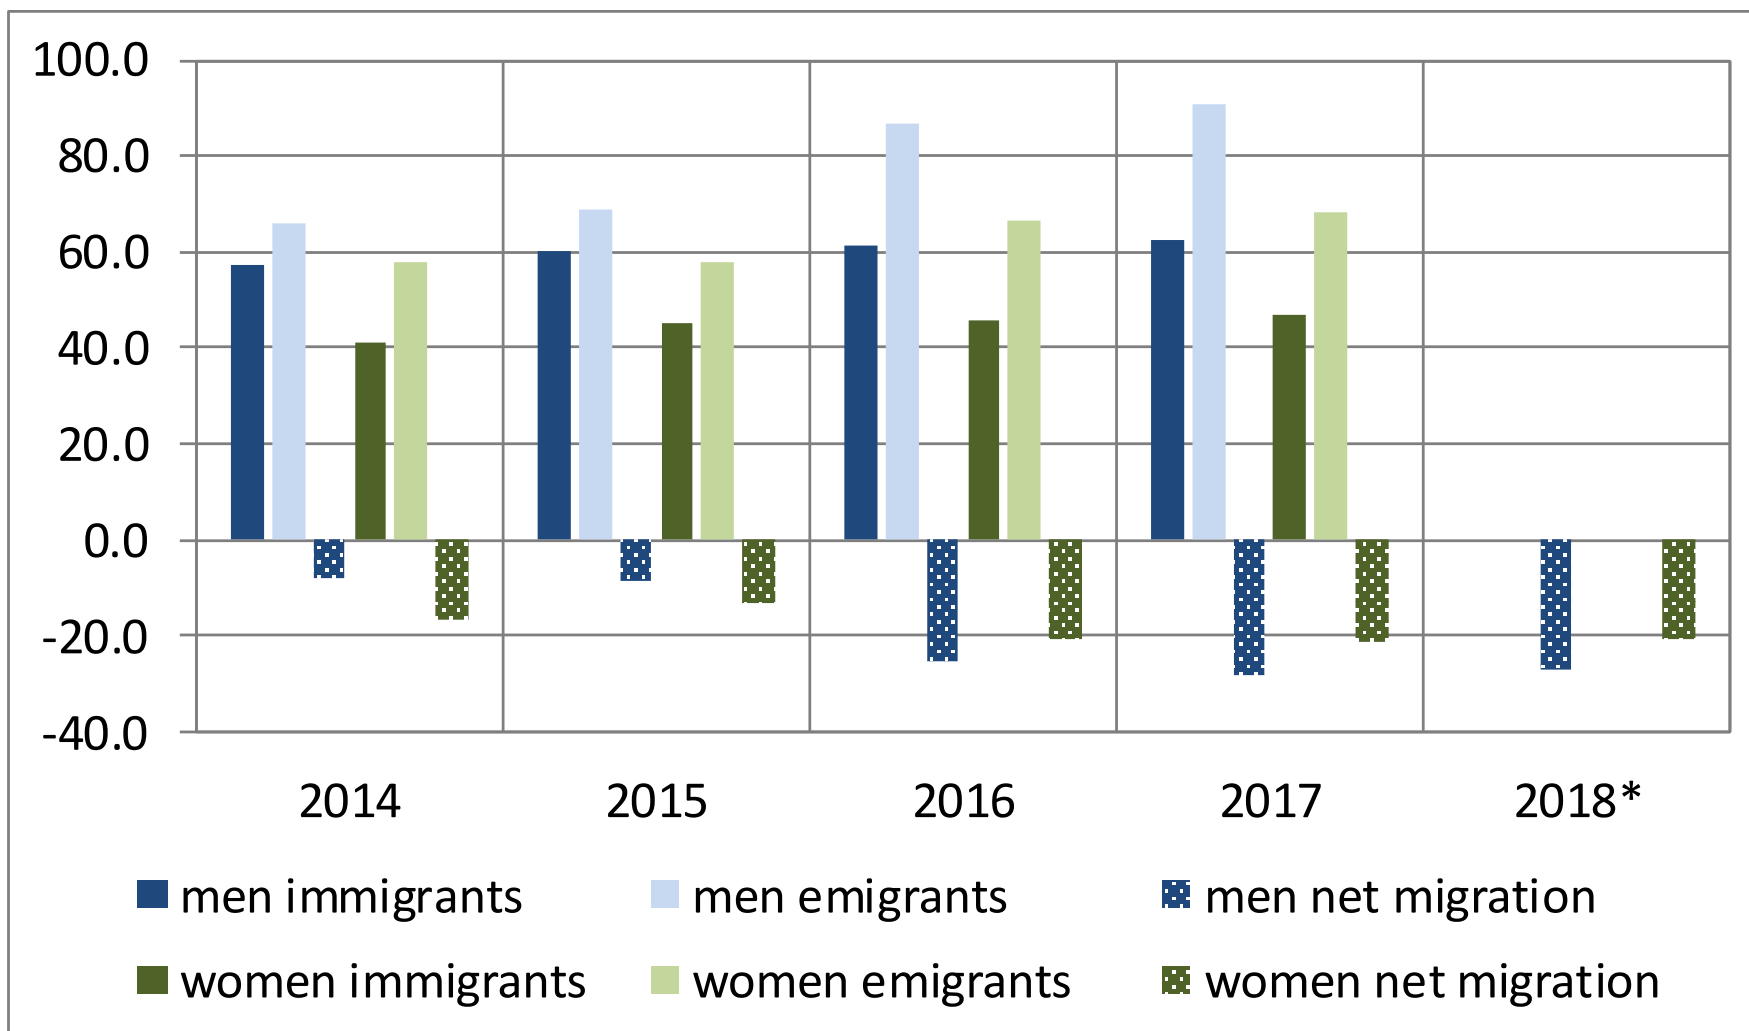

International migration by sex, 2014-2017, thou persons

2017

109,7 Immigrants

159,1 Emigrants

- 49,4 Net migration

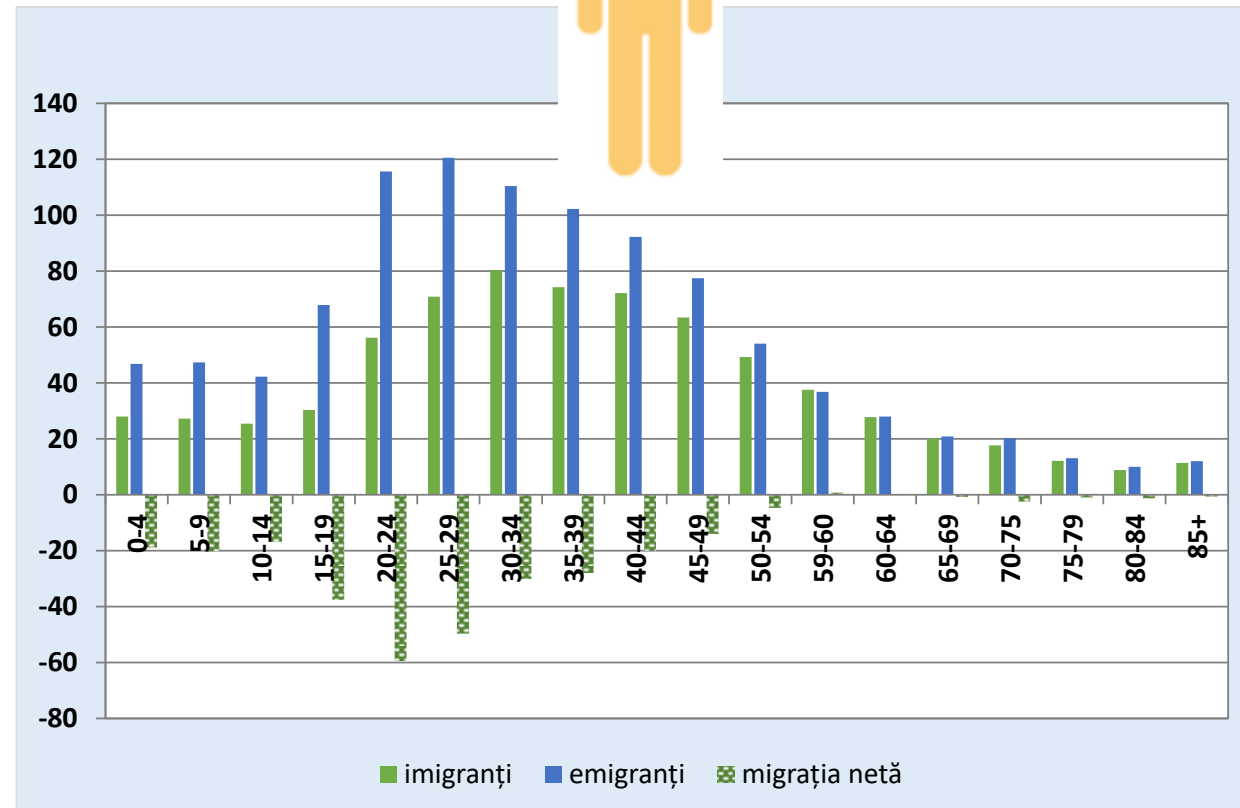

* - provisional data, based on the assumption that migration rates by age and sex registered in 2017 remained the same in 2018

AGE & GENDER PATTERNS

International migration by sex and age groups, 2017, rates by 1000 persons

AGE & GENDER PATTERNS

International migration by sex and age groups, rates by 1000 persons

International **IMMIGRATION** rates by sex and age groups, 2014 and 2017

International **EMIGRATION** rates by sex and age groups, 2014 and 2017

AGE & GENDER PATTERNS

International **NET MIGRATION** by sex and age groups, 2014 and 2017, rates by 1000 persons

AGE & GENDER PATTERNS

International NET MIGRATION rates, 2014 and 2017

Moldovan citizens

Foreigners

TIME SPENT ABROAD, frequency

Number of days spent abroad by usual residents of the Republic of Moldova 2014-2017

	183-274	275+	Total	
			183+	% of RM population
2014	212.4	131.2	343.6	12.0%
2015	189.0	128.3	317.2	11.2%
2016	185.2	125.6	310.8	11.1%
2017	191.0	127.0	317.9	11.5%

*This numbers represent the number of different Moldovan citizens who spent abroad the stated number of days and therefore is not the simple sum of the yearly number of Moldovan citizens since many do that **more than once***

Estimation of migration & usual resident population

CHALLENGES versus ACTIONS

- Lack of *reliable data* on international migration based on the definition of *place of usual residence*
- Access to *individual/ personal* data from administrative sources
- *Double citizenship* and uncontrolled border through Transnistria region
- Processing *big volumes* of records

- ✓ Comparative analysis, negotiation, communication
- ✓ Depersonalization procedures applied
- ✓ *Record linkage* of 2 DB (RM citizens vs Foreigners) by name, surname, date of birth
- ✓ Several software used to test imputation, editing, processing of about 130 mln crossings 2013-2018 (*Oracle, Visual FoxPro, R, STATA, SPSS*)

~~impossible~~

Next steps

Institutionalization of the data sharing for border-cross recording of entrances and exits to/from RM and residence address at **individual level** via Government's M-Connect **interoperability platform**

Produce UR population estimates in **territorial perspective** (at the lowest sub-national levels): internal and external migration by area of residence

Dissemination of migration data in **user-friendly** formats and meeting their **needs**

No MIGRANT left behind!

Ensure **continuity** of provision of **qualitative and reliable** population statistics for policy design, funding, monitoring & evaluation, planning and research

Mapping of available administrative registers and **develop** the **Statistical Population Register**

A better **linkage** between strategic **planning** process and the **monitoring & evaluation** process

VISUALS, info-GRAPHICS & ANALYSIS

Thematic info-graphs

Women (most vulnerable – 10 groups)

Analytical briefs

Profile of Labour Migrant Women

Demographic characteristics of labour migrant women

- Every 3rd migrant is a woman (36%)
- Every 13th woman aged 15 and over migrates for work purpose
- Out of 10 migrant women:
 - 7 are young women or women in fertile age (15-44 years old)
 - 4 are from the Centre, 3 from the South and 3 from the North regions of the country
 - 7 are from villages and 3 are from towns
 - 5 migrate to Russia and 3 migrate to Italy

Education level of labour migrant women

Have higher education, secondary specialized or vocational education

- 1 in 2 migrant women
- 6 out of 10 women left for work to Italy
- 5 out of 10 women left for work to Russia
- 4 women out of them are trained in social sciences, business and law, engineering, processing, and constructions

Health conditions of labour migrant women

- Over 1/3 of returned women assessed their health condition to be better than before leaving (35.3%)
- The worsening of the health condition served as a reason to return home for 1/10 women (13%)
- About 1 in 4 children with mothers who left abroad for work stated (2006) that no one went with him/her to the doctor

Profile of Women from rural area

Demographic characteristics of women from rural areas

- Average age is 37 years old
- More than 70% are with higher education
- Average life experience is 17 years old
- 2 out of 10 women are aged 65 years old and over

Training level of women from rural area

- Less than half of women aged 15 years old and over have higher education, secondary professional or vocational education (46.4%)

Profile of Women in Economy

Demographic characteristics of women in economy

- More than half of women are employed in the economy
- 1 out of 10 women are in leadership positions
- 1 out of 10 women are in elected and appointed positions

Profile of Women living with HIV

Demographic characteristics of women living with HIV

- There are 142 000 people living with HIV in the country
- 1 out of 10 women are living with HIV
- 1 out of 10 women are living with HIV in the economy
- 1 out of 10 women are living with HIV in the economy

Profile of women and girls with disabilities

Demographic characteristics of women and girls with disabilities

- 4.8% of the female population of the country are women with disabilities
- 1 out of 10 women with disabilities are in the economy
- 1 out of 10 women with disabilities are in the economy

Profile of Women in Elected and Appointed Positions

Women in leadership positions

- 1 out of 10 women are in leadership positions
- 1 out of 10 women are in leadership positions

Profile of Women in Decision-Making Process

Demographic-economic characteristics of women in management positions

- 1 out of 10 women are in management positions
- 1 out of 10 women are in management positions

Profile of Elderly Women

Demographic characteristics of elderly women

- 1 out of 10 women are aged 65 and over
- 1 out of 10 women are aged 65 and over

Profile of Roma Women and Girls

Demographic characteristics of Roma women and girls

- 1 out of 10 women are Roma women and girls
- 1 out of 10 women are Roma women and girls

Profile of women from rural areas

Profile of Women in Economy and Business

Profile of Roma Women and Girls

Profile of women with disabilities

Profile of women-victims of violence

Profile of Elderly Women

Profile of Women in the Decision-Making Process

Profile of women living with HIV

10 SDGs indicators RELATED to migration - RM 2019

Indicator	Tier	disaggregation	type	data source	M&E
3.c.1 Health worker density and distribution	I	A: by specialties / occupations (doctors, medical staff, dentists, pharmacists), by districts, medians, by sex only doctors	global adjusted	ANSP	MoHLSP
4.b.1 Volume of official development assistance flows for scholarships by sector and type of study	I	A: total	global	global DB	MoF
8.8.1 Frequency rates of fatal and non-fatal occupational injuries, by sex and migrant status	I	A: total by accident types, sex, economic activities M: migration status, occupations	global adjusted	NBS	MoHLSP
8.8.2 Level of national compliance with labour rights (freedom of association and collective bargaining)	I	A: total	national proxy	MoHLSP, CNSM, CNPM	MoHLSP
10.7.1 Recruitment cost borne by employee as a proportion of monthly income earned in country of destination	III	Missing	global	BRD	MoHLSP
10.7.2 Number of countries with migration policies that facilitate orderly, safe, regular and responsible migration and mobility of people	III	Missing	global	MoHLSP, BMA, IGPF	MoHLSP
10.c.1 Remittance costs as a proportion of the amount remitted	I	A: total M: type of service providers; instrument used for payment /receipt of remittances	global	World Bank, National Bank	MoEc
16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation	Tier I	Available: total, sexes, adults, children, areas of residence, countries of exploitation, forms of exploitation	global adjusted	IGP/MoInterior	MoHLSP
17.3.2 Volume of remittances (in United States dollars) as a proportion of total GDP	Tier I	A: total	global adjusted	National Bank	National Bank
17.18.1 Proportion of sustainable development indicators produced at the national level with full disaggregation when relevant to the target, in accordance with the Fundamental Principles of Official Statistics	Tier III	A: available, partially, missing	national proxy	NBS	State Chancellery

24 SDGs indicators RELEVANT for disaggregation - RM 2019

No.	Tier	disaggregation	indicator type	data source	M&E
1.1.1	I	A: total, urban / rural; can be estimated by sex, age (15+, 15-24, 25+), occupational status (= working poor)	global adjusted	NBS/HBS	?
1.3.1	I	A: total, insured / uninsured, ages, women / men M: country of origin	global divided	MoHSPF	MoHSPF
3.1.1	II	A: total, by areas and districts	global	ANSP	MoHSPF
3.2.1	I	A: total, by areas and districts	national proxy	ANSP	MoHSPF
3.3.1	I	A: total, sexes, age groups, high risk population categories, M: area of residence	global	ANSP	MoHSPF
3.4.1	II	A: total, sexes	global	ANSP	MoHSPF
3.8.1	III	A: total	global	ANSP	MoHSPF
3.8.2	III	A: total, urban / rural, sexes and household head age, quintiles. Possible to estimate separately for households with children (0-17 years), or with migrants	global divided	NBS/HBS	MoHSPF
4.1.1	III	A: by sexes, areas M: Disability status, socio-economic status, ethnicity	global divided	PISA	MoEdu
4.3.1	II	A: total, age, gender, urban / rural M: income - not foreseen, not available	global adjusted	NBS/LFS	MoEdu
4.6.1	II	Irrelevant			
5.5.2	I	A: total, rural / urban, on economic activities, forms of property	global	NBS/LFS	MoHSPF

No.	Tier	disaggregation	type	data source	M&E
8.3.1	II	A: total, sexes	global	NBS/LFS	MoHSPF
8.5.1	II	A: total M: by occupation, age, disabilities	global adjusted	NBS/wages	MoHSPF
8.5.2	I	A: total, sexes, age group and disability; M: disabilities	global	NBS/LFS	MoHSPF
8.6.1	I	A: total, sexes, age groups (15-24 years, 15-29 years, 15-34 years)	global	NBS/LFS	MoHSPF
8.8.1	I	A: total by accident types, sex, economic activities M: migration status, occupations	global adjusted	NBS/wages/accidents	MoHSPF
8.8.2	I	A: total	Nat. proxy	CNSM	MoHSPF
8.10.2	I	A: total, types of accounts, sexes M: by income, age, level of education, urban / rural	global + national proxy	NBM	NBM
10.2.1	III	A: total, sexes, age groups, persons with disabilities	global	NBS/HBS	MoEco
10.3.1	III	A: sexes, age group, residence area, discrimination criteria, entities in which they were discriminated	global	CPEDAE	CPEDAE
11.1.1	I	A: total, urban / rural, quintiles, sexes, age groups, disability	global divided	NBS/HBS	MoEco
16.1.3	II	A: total, urban / rural, age, education; M: citizenship, ethnicity, incomes	global adjusted	NBS/violence	MoHSPF
16.9.1	I	A: total, age, sexes, areas	global	NBS, ANSP	MoHSPF

RE-USE of data for SDGs

URBAN MOBILITY PLAN DEVELOPMENT IN CHISINAU

URBAN AND PERI-URBAN
LAND USE / LAND COVER
CLASSIFICATION AND
ASSOCIATED CHANGES

CENSUS-BASED POPULATION
DISTRIBUTION/ DENSITY
(BY DAY AND NIGHT)

INSIGHTS INTO RECENT POPULATION AND
MOBILITY TRENDS

Multiple sources:

- Orthophoto (MD GeoPortal & private)
- ESA Earth observation data
- Cadastral limits and building footprints
- Census data (NBS)
- Call Detail Records
- Electricity consumption data
- GIS roads, railways network and public transportation, stations/nodes
- Micronarratives

Night-time population of Chisinau

Walking distance from each bus stop

- Stations
- Transport Network
- Area of Interest
- ServiceArea_100m
- ServiceArea_200m
- ServiceArea_300m

Potential analysis:

- Mobility & Network Analysis
- Connectivity between bus stops and residential areas
- Urban transport demand
- Distance to specific hotspots (schools, hospitals, fire departments, etc)

TARGET 11.2

AFFORDABLE AND SUSTAINABLE TRANSPORT SYSTEMS

Data sources used

Civil registration,
birth/death medical
records, border crossings,
foreigners registration

Other ministries and government agencies
(environment, finance, foreign affairs, agriculture, water and so on)

Earth observation
Satellite/drone imagery
In situ observatories

Land and building
cadastre

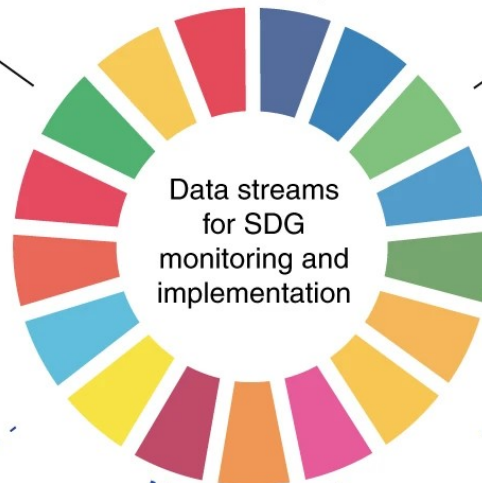

Spatial data infrastructure
Road and water networks
Land cover and land use

National statistical offices
Censuses and surveys
Vital statistics

Traditional

Non-traditional

Citizen-generated data
Citizen science
Social media
Wearables

Census, HBS, LFS, Dedicated surveys (labour migration), enterprises surveys

International organizations

Orange CDRs,
Balance of payment

Commercial data
Mobile phone records
Financial data

Official sensor networks
Weather and air-pollution stations
Hydrological stations

CONCLUSIONS, LESSONS LEARNED, NEXT STEPS

Conclusions

- Migration is a **key issue** in RM
- Moldovans are **intensively involved in international migration** in **both directions** challenging existent migration definitions and concepts
- Migration should **not only** be measured in terms of the **net migratory balance**: high exposure of RM inhabitants to other cultures and countries may have extremely **positive implications** and open **new opportunities**
- Based on a **solid basis**: the border-cross recording of entrances and exits to/from RM at **individual level**, but **depersonalized** data
- For each individual it was possible to **calculate accurately** how much **time was spent abroad/in-RM**
- Migration estimates was calculated using **international recommended definitions**
- For the **first time** in many years RM has a **full and realistic picture** of **migration flows** in and out the country

Lessons learned

- **Partnerships** with data holders and data users- guarantee for success through **cooperation & collaboration**
- **Continuous communication** throughout the process within the **data value chain**
- **Diversification** of statistical practices and **innovative** approaches
- **Harmonization** of the core and secondary **legislative & regulatory framework**
- **Acceleration of the modernization in statistics**
- **Peer-to-peer** learning and sharing

Challenges

- Lack of methodologies for estimating indicators at global level, their continuous updating
- The correspondence between global and national methodologies (often lacking)
- The estimation of some composite indicators implies data from different institutions
- The challenges related to the CPA reform, changes in state institutions, institutional memory
- Relations between state institutions and subordinate ones
- Lack of understanding of what needs to be presented
- Limited human capacities and data literacy

Short-term PRIORITIES

A better **linkage** between strategic PLANNING process and the MONITORING & EVALUATION process

Strengthen intra- and inter-institutional **cooperation** in terms of monitoring DATA and INFORMATION NEEDED for the planning/monitoring processes

Strengthen **capacities** for MONITORING, REPORTING and EVALUATION in ministries and other public authorities –

Develop **capacities** for DATA PRODUCTION - accurate, timely and disaggregated

TARGET 17-14

ENHANCE POLICY COHERENCE FOR SUSTAINABLE DEVELOPMENT

Statistical annex

VNR 2020

TARGET 17-16

ENHANCE THE GLOBAL PARTNERSHIP FOR SUSTAINABLE DEVELOPMENT

Mulțumesc!
THANK YOU!
